Description

CANTIERE DELLE MARCHE NAUTA AIR 90 DESCRIPTION

About Cantiere delle Marche Nauta Air 90 yacht model:

Cantiere delle Marche Nauta Air 90 is a series of Explorer yacht 91ft/27.65m superyachts built in in Ancona, Italy by Cantiere delle Marche.

Created to a design of NAUTA DESIGN, Nauta Air 90 has a Semi-displacement Aluminium hull and Aluminium superstructure driven by 2x CATERPILLAR C18 ACERT (2x 885 hp) engines to a maximum speed of 16 knots while comfortably cruising at 13.5 knots. The fuel tank has a capacity of 25000l/5495gal what allows a yacht to cover 3600 nautical miles without the need to refuel. Cantiere delle Marche Nauta Air 90 has a beam of 6.5m/22ft. The gross tonnage of this Explorer yacht Cantiere delle Marche is gross tons. That shows exactly how much interior space this yacht has.

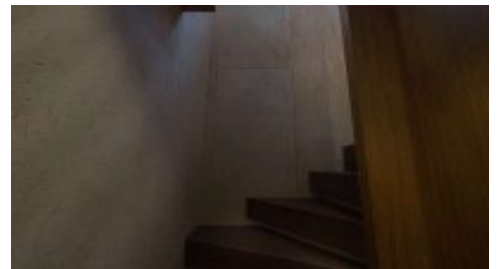

Cantiere delle Marche Nauta Air 90 can accommodate up to 10 people in 4 elegant staterooms to be assisted by a total of 4 crew members with 2 cabins for crew members.

CDM Nauta Air 90' must be discovered outside and inside. The first impression is how broad it feels. The designers paid special attention to the exteriors, but not at the expense of the interior. Both social and private areas offer a sense of space: a luxury. A yacht that invites you to go out and enjoy the atmosphere, with places designed for sunbathing, relaxing, eating or simply sailing pleasantly. It has a large cabin, solarium area on the main deck in front and spectacular flybridge of 72 square meters. This is precisely the point that separates Nauta Air 90 from its competition. It has a hard top to provide shade, and if desired, with removable awnings. Two tables accompanied by a bar with grill, refrigerator, champagne and ice machine: attributes that promise an incredible experience on board. With regard to the technical specifications, the boat is top notch, from the solid aluminum construction to the electric stabilisers and the remote control valves. At cruising speed at more than 13 knots, the Nauta Air 90 showed good sound insulation: the noise is not more than 60 dBA in the lounge and the main room. To maximise the reach of the boat, it is advisable to travel at 10 knots, but at nine, the Nauta Air 90 really stands out. At that speed, thanks to two six-cylinder Caterpillar C18 Acert engines at 1200 rpm, it becomes a mile-eating machine: up to 4,000 nautical miles giving it an extraordinary transatlantic capacity.
