Description

Being at the forefront of innovation and setting new benchmark in the Explorer yachts segment is in CdM's DNA. The new Flexplorer line is a testament to this approach.

Flexplorer is a stunning piece of technology wrapped in an elegant design by Sergio Cutolo/Hydro Tec. Her eye-catching superstructure, almost vertical bow, huge deck are not styling exercises as they serve to provide the yacht with all feature that make her a perfect ocean-going vessel designed to face all sort of weather conditions in total safety and comfort.

Among Flexplorer's genuinely unique aspects it is worth mentioning the fold-down bulwarks that enlarge the deck space astern creating a huge terrace of around 115 square metres and an A-frame crane perfectly encompassed in the deck's flooring. This feature itself is a remarkable piece of engineering purposely developed by CdM's to provide the yacht with a powerful crane to launch an 8.5 mt tender without interfering with full use of deck space. It goes without saying that the A-frame crane also allows much safer loading and offloading operations as well as it eliminates any inclining issue.

The Flexplorer range includes vessels completed and in construction between 39 and 47 mt, a maximum beam of 8.60 mt, and over 5000nm of Range.
