Description

With a combined internal and external area of over 5400 sq. ft the Granocean W-80 is nothing less than a Superyacht.

Like the smaller versions, the W-80 offers semi-custom interior and exterior features, with spaces never seen before on a vessel under 24 mt in LOA.

She is certified by RINA to CE category A (unlimited navigation) and when comparing the hull design and clearance with other catamarans you will understand why.

Different configurations are available, including a fully "carbon fibre" structure, long range and high speed.

Designed is Howard Apollonio and structural engineering is followed by Gurit SP / HIGH MODULUS, two of the most important names in the world industry.

The model shown in the photos features an expansive saloon, bar and dining room for eight. She has a full beam master forward with four guest cabin and dedicated crew area and cabins.
